

OUR NEW CLOSED TYPE
PROFILE STRUCTURE

OUR NEW CLOSED TYPE
PROFILE STRUCTURE

In 2012 we have started to manufacture closed type profile with the implementation of our new Roll-Forming Line at our facilities.

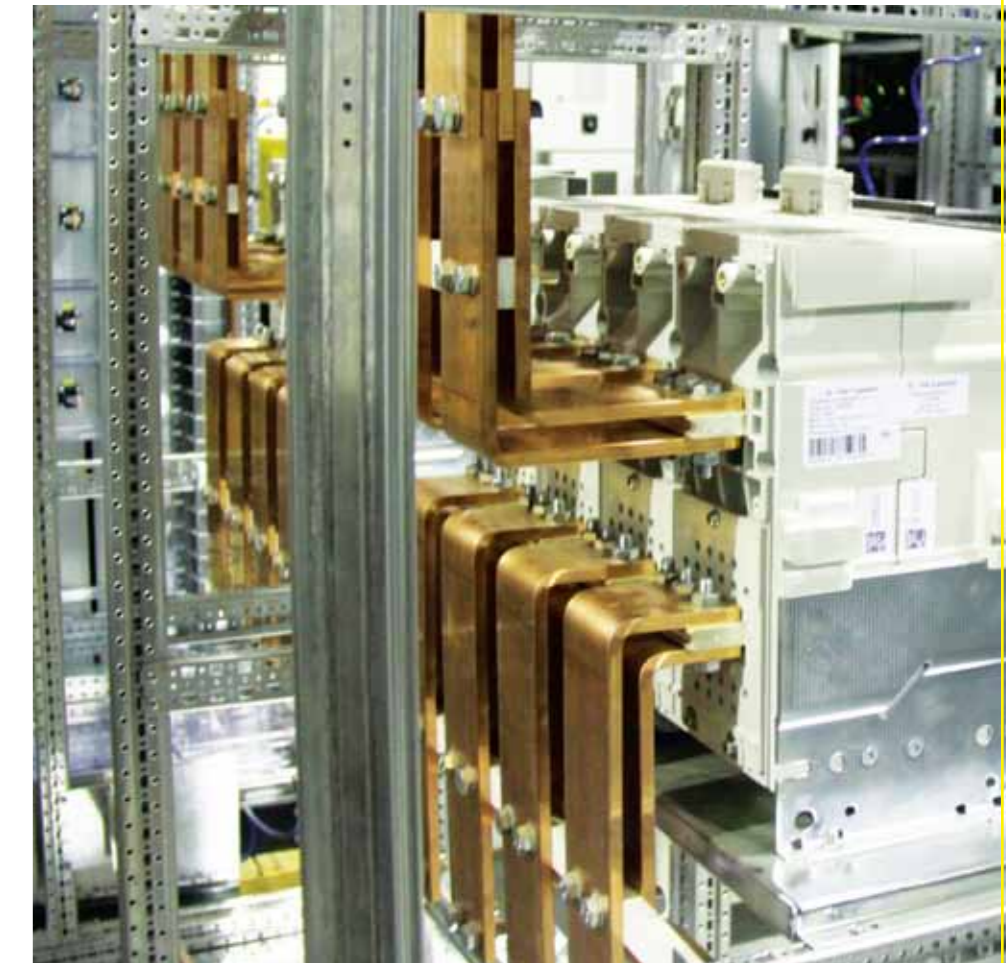

This special profile is designed after long studies of our own R&D department.

Our new profile consist of 27 bendings and offers our customers maximum strength and rigidity with an esthetic outlook.

Protection degree is upgraded to IP65 level in modular structure with the gasket channels of new profile.

On the other hand panel combinations can be easily done by a single pin and with flat pack availability we can provide fast and practical solutions to our customers.

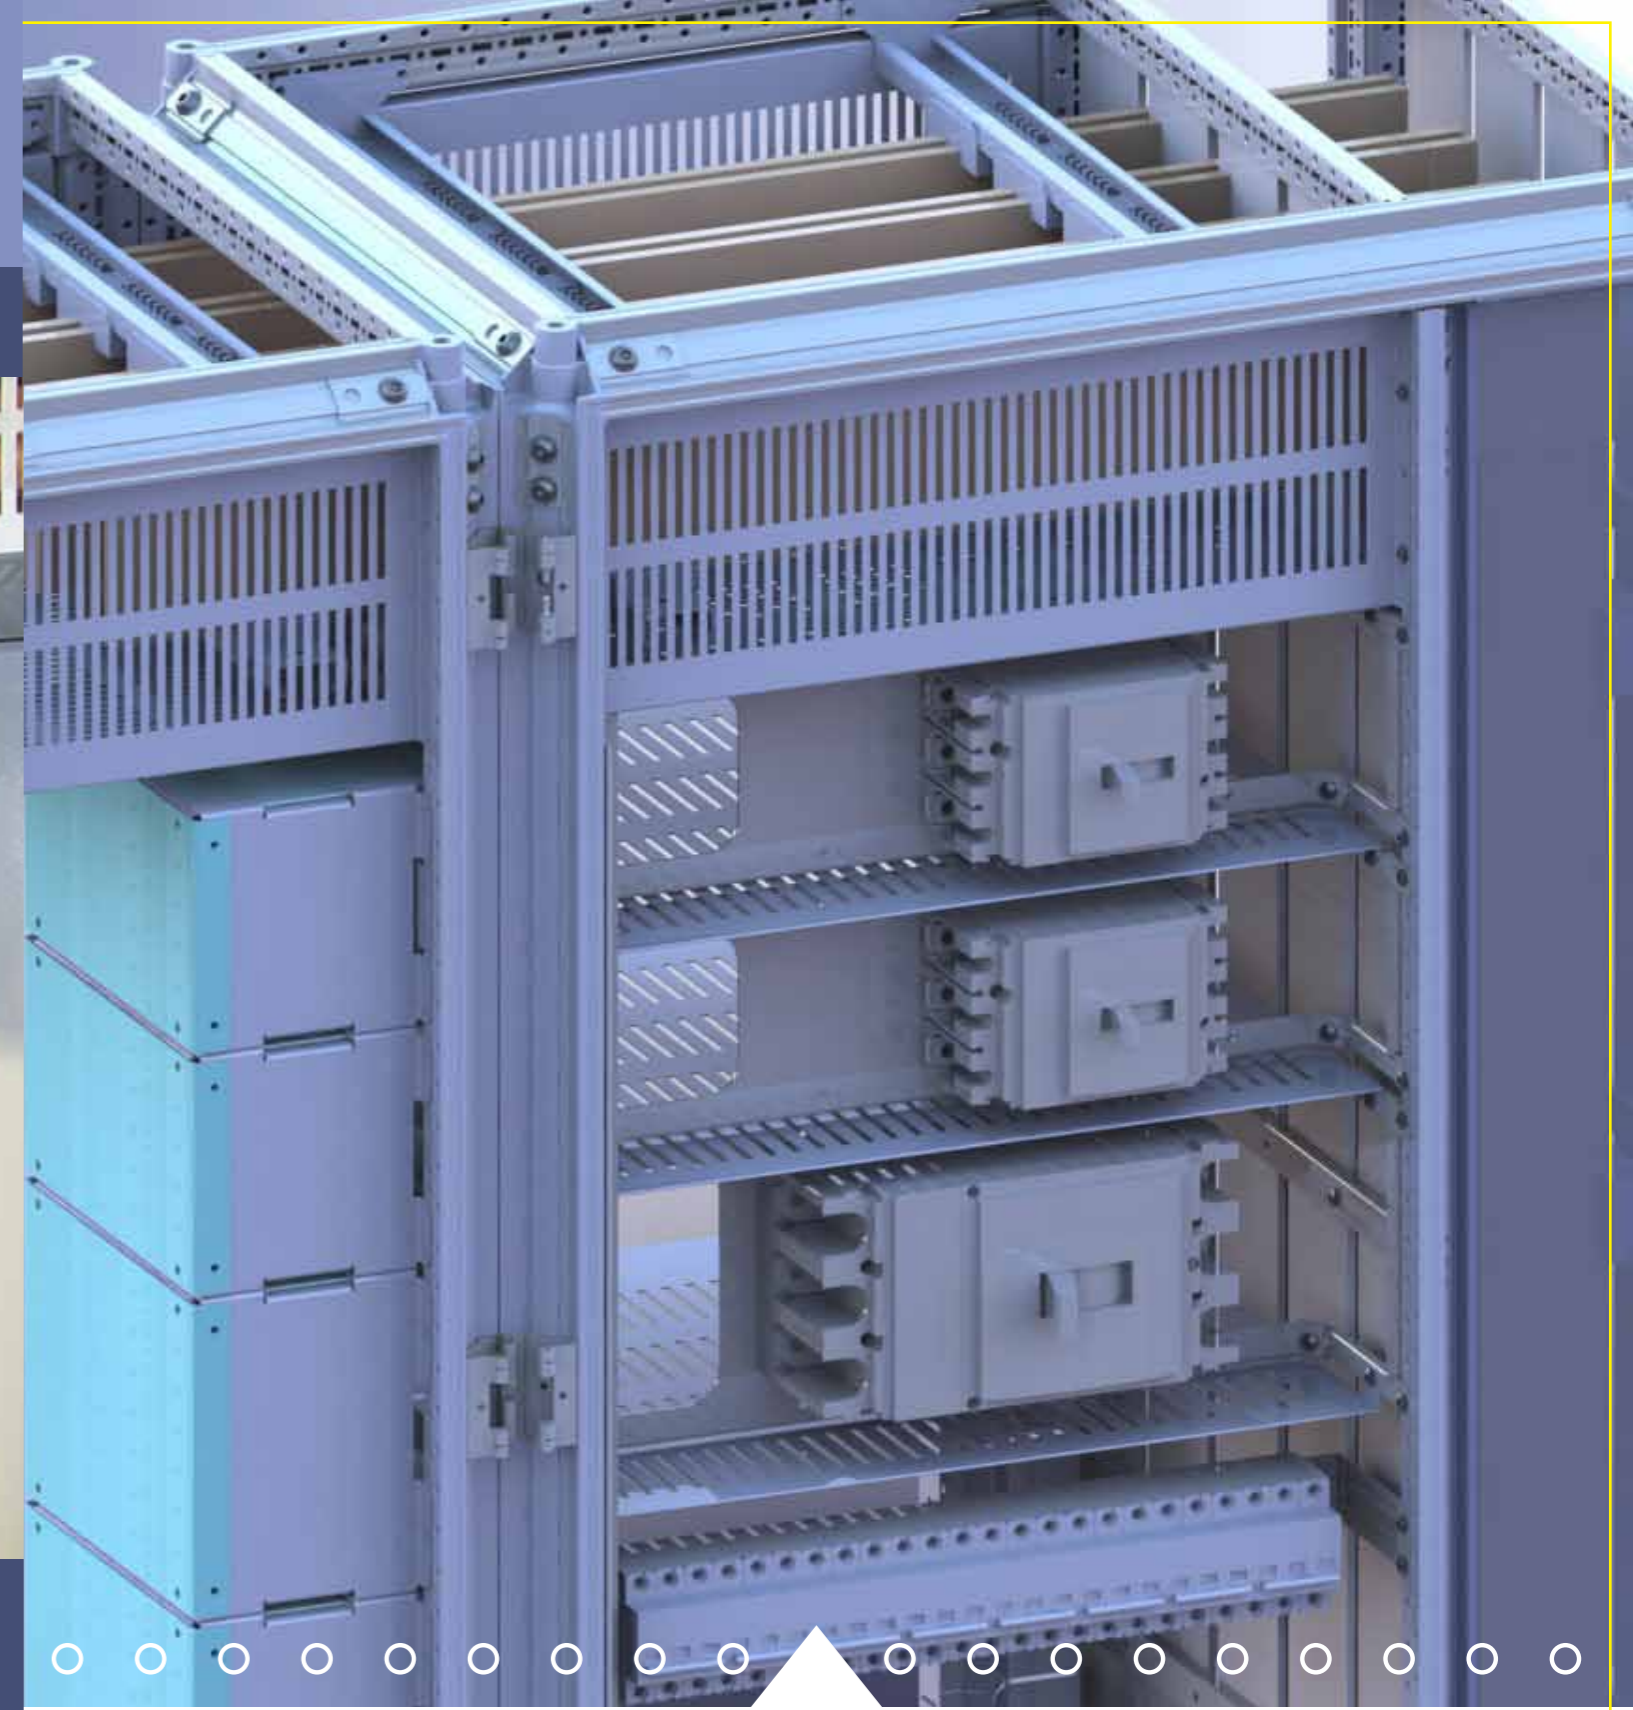

SPECIAL DESIGN
PROFILES

FAST & PRACTICAL
SOLUTIONS

We have upgraded our Full Type Test according to new IEC 61439 standards with our special design closed profile structure as 6300A 120kA 1sec and 65kA 3sec Form 4B from KEMA / DEKRA Laboratories in 2012. Beside Full Type Test Certificate our panels successfully passed from Internal Arc Containment and Seismic Qualification Tests as well. Additionally our company has ISO 9001 – Quality Certificate and products have TSE, CE , IEC/EN 60529 Protection Degree and GOST-R Certificates.
